## Education

### ~ Diploma, Interactive Media Design

January 2021 – April 2022

*Fanshawe College, London, Ontario*

The Interactive Media Design program prepared me professionally for an evolving job market in digital media design, development and production, providing comprehensive training in new media technologies with an emphasis on web application design, interactive rich media, and current technologies for developing usable, media-rich sites and applications. The program combines courses in design, coding, marketing and media management and incorporates industry-standard tools from companies such as Adobe Creative Cloud and Maxon, as well as open-source technologies for web application development using HTML, CSS (SASS), JS (VUE), PHP and MySQL.

### Technical High School Diploma, Software Development

January 2017 – September 2019

*Ricaldone Technical Institute, San Salvador, El Salvador*

The Software Development program prepared me to join the development processes of desktop applications, web and mobile devices. As well as the creation and management of various types of databases, and installation, configuration, and maintenance of servers. All previously mentioned helps me to apply adaptations or development of software components in various economic and social areas in which the numerical quantification of information, data and innovation are required. Using different programming languages like Java, C#, C++, HTML, CSS, JS, PHP and MySQL.

## Skills

- |   |                        |                 |                       |                 |
